DETAILED ACTION

Obvious Type Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,395,578.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the patent claims include the exact manner of selecting either first or second the major surface of the respective circuit board would obviously include any manner by which either first or second the major surface of the respective circuit board. For these reasons, claim 1 is seen as obvious variations of the patented claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 2825

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kinsman (U.S. 6,172,419 B1) in view of Ohsawa et al. (U.S. 6,093,970).

Kinsman discloses a semiconductor device with

A circuit board strip (102) having via (108) connected between bond finger (124) and ball land (104) (see Figure 32)

A chip (120) having first and second major surface in the through hole (114) with input/output (122, 110) electrically connecting by bond fingers (124);

The chip is encapsulated by resin (126) and fusing conductive balls (112) (see Figure 2).

Kinsman teaches the above outlined features except for singulating the circuit board strip into semiconductor packages. However, Ohsawa discloses a semiconductor device with (1)... singulating the circuit board strip into semiconductor packages (see Figure 2G). Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the semiconductor of Kinsman (accordance with the teaching of Ohsawa). Doing so would facilitate the manufacture of the semiconductor and reduce the operational cost.
